

DCT-511/DCR-511

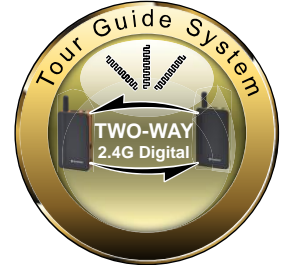

2.4G DIGITAL TWO-WAY TOUR GUIDE SYSTEM

Shouldn't taking a guided tour be an interactive experience? Allow your guests to interact with you and ask questions, not just a presentation. Give them the full experience!

CHIAYO's new 2.4GHz two way tour guide system allows just that! Clients can simply push a button to ask a question!

Features

- Automatic frequency-hopping provides interference-free operation
- Ultra light and compact
- Operation range approx 50 meters
- Stereo transmission
- Interactive PRESS-TO-TALK button
- MIC-MIX-AUX IN switch provides speech and music play individually or simultaneously
- Signal LED and beeping remind operator to keep within the tour guide's range
- Volume and mute controllable
- Built-in Lithium rechargeable battery with universal mini-USB charging port
- Charging time takes only 3.5 hours
- Battery life: transmitter approx 10 hours, receiver approx 16 hours
- 20-unit charging base available
- No limit to the number of receivers
- Make your tour the full experience
- Suitable for guided tours, language learning and interactive activities
